

**SMALL DREDGER PROGRAMMATIC ALTERNATIVES ANALYSIS (SPDAA)
FOR DISPOSAL OF MAINTENANCE DREDGED MATERIAL
IN THE SAN FRANCISCO BAY REGION
AGREEMENT**

Project Name _____

I, _____ (permittee / applicant or authorized agent) have read the SPDAA (10/28/04) developed by the LTMS agencies for small dredgers. A small dredger project is characterized by having a project depth of twelve feet Mean Low Lower Water (MLLW) or less, and having an annual dredging / disposal volume of 50,000 cy or less. My project meets this definition, and I believe that the SPDAA appropriately evaluates issues relevant to it.

Please check the boxes that apply to your project:

☐ The following upland disposal or reuse site is available and feasible for this project, and I propose to use it _____
(NAME OF SITE)

☐ An upland / wetland disposal or reuse site is NOT available and feasible for this project. I propose to use the following multi-user in-Bay disposal site:

- ☐ Alcatraz (SF-11)
- ☐ San Pablo Bay (SF-10)
- ☐ Carquinez Strait (SF-9)

I attest that the above information is true and accurate to my best available information and knowledge.
